### (3) 区画浸水の影響

セミサブリゲの稼動時の想定喫水に対し、コラム部一区画またはロワーハル一区画に浸水させた時の復原力曲線を計算した。なお、計算方法はM 1模型は浸水量に相当した量の浮力が消滅したと仮定する方法で行ない、M 2およびM 3模型では、浸水量と同量の荷重が浸水個所に付加したと仮定して行なった。

なお、コラム浸水個所はM 1模型はFig. 4.13の第一コラムの第二セクションに、M 2模型およびM 3模型では、前述のFig. 3.2およびFig. 3.3で示した模型概要図の最後部右のコラム1本を浸水区画とした。

ロワーハルへの浸水個所は、M 1, M 2およびM 3模型とも、Fig. 4.13に示す様に1本のロワーハル最前部外側の区画に浸水させた。

ロワーハル部の浸水時の復原力曲線を、M 1模型ではFig. A-30に、M 2模型ではFig. A-31, A-32に、M 3模型ではFig. A-33, A-34に各々を示す。
